

DEEPFISHMAN

Management And Monitoring Of Deep-sea Fisheries And Stocks

Project number: 227390

Small or medium scale focused research action
Topic: FP7-KBBE-2008-1-4-02 (Deepsea fisheries management)

DELIVERABLE D8.5

Title: Stakeholder Workshop

Due date of deliverable: M2 (May 2009)

Actual submission date: M3 (29 and 30 June 2009, in Brussels)

Start date of the project: April 1st, 2009

Duration : 36 months

Organisation Name of lead coordinator: Ifremer

Dissemination Level: PU Public

Date: July 9th, 2009

Research project 2009-2012 supported by the European Union,
Seventh Framework Programme

The first stakeholder workshop scheduled in DEEPFISHMAN was held on 29-30 June 2009 at CLORA, 8 rue des Arts, Brussels (Workshop timetable in annex 1).

The organization of the workshop was discussed during the kick-off meeting (12-14 May 2009, Nantes). Where it was decided to have the workshop led by a facilitator. The workshop was announced by email. Invitations (model in annex 2) were circulated by project partners at Case Study level, through the RACS and other lists of stakeholders.

The workshop was attended by 14 people (attendees list in annex 3: project partners, scientists, scientists outside of the project, RMFO, ICES, EC, fishing sector, Government representative).

The workshop was designed to provide:

An opportunity for stakeholders to meet DEEPFISHMAN project partners,

- Presentations and discussions of key aspects of the three-year project, and
- a stakeholder analysis to underpin DEEPFISHMAN's engagement and communication strategies.

A number of participatory sessions made it possible to:

1. Identify the stakeholder community
2. Discuss the strengths and weaknesses of current management regimes and fisheries assessments methodologies
3. Identify channels and details of stakeholder engagement, and
4. Devise a Communication Strategy for the project.

The consensus report from Stakeholders workshop (deliverable 8.6 due on M4 July 2009) will be made available on the DEEPFISHMAN website (<http://www.ifremer.fr/deepfishman>), disseminated to workshop participants, deepfishman partners, invited stakeholders and further distributions will be requested to RACs and other stakeholders.

Annex 1 : Workshop timetable (actual)

	Monday 29 June 2009		Tuesday 30 June 2009
		09:00	c. Assessment + reference points and discussions
			5. SW Current Stock Assessment
10:00	Registration	10:00	5. SW Current Stock Assessment
	a. DEEPFISHMAN presentation		5. OT Stock Assessment
	Workshop and Day 1 intro		5. OT Stock Assessment
11:00	1. Stakeholder identification	11:00	5. OT Stock Assessment
	Coffee / tea break		Coffee / tea break
	2. Stakeholders essential to the project		d. Available data – Biology, ecology, ecosystem
12:00		12:00	e. Available data – economic and social
	3. Stakeholder interested in the project		6. Brainstorm Future Management regimes
	Report back		and data needs
13:00	Lunch	13:00	Lunch
	b. Current Management regimes	14:00	f. Future Management regimes
	4. SWOT Management regimes		6. Brainstorm Future Management regimes
	Identification		g. Suggestions and industry data
15:00		15:00	6. Brainstorm Future Management regimes
	Coffee / tea break		7. Stakeholders & Project communication
	4. SWOT Management regimes		Wrap up Workshop
16:00	Discussions and report back		
16:30			
	Wrap up Day 1		

Annex 2 : invitation send by e-mail on June 7th, 2009

**Management and Monitoring of deep-sea Fisheries and Stocks
Stakeholder Workshop
29 and 30 June 2009**

Deepwater fisheries pose particular difficulties for management. Target species are difficult to assess and they are generally vulnerable to overfishing. The EU project DEEPFISHMAN will develop a range of strategy options for the management of deepwater fisheries in the NE Atlantic that will take account of these factors. Firstly, the aim will be to identify new and more effective assessment methods, reference points, control rules and management strategies to be used in the short term, making better use of available data. Secondly, a reliable long-term framework will be developed for which additional data needs will be specified in order to fill current information gaps to achieve reliable long-term management requirements. This work will be developed by examining a range of case studies selected to reflect the diverse characteristics of the different types of deepwater fishery. The socio-economic profile and projected impact of the management strategy options will be examined. The project outputs will aim to provide robust guidelines for deepwater fisheries management suitable for adoption within the Common Fishery policy.

The workshop will provide short descriptions of the three-year project tasks and partners.

A number of participatory sessions will:

1. **Define the stakeholder community**
2. **Discuss Strengths and Weaknesses of current management and monitoring regimes**
3. **Identify channels and details of stakeholder engagement**
4. **Finalise the project Communication Strategy to maximise stakeholder engagement**

**CLORA 8 avenue des Arts, 1210 Métro Madou
Monday 29 June 10am - 4:30pm, Tuesday 30 June 9am – 4pm**

Free Registration before 26 June: Patricia.Thibault.Pralin@ifremer.fr
